

Meet Miss Farran

I enjoy reading and I love sharing my passion for books with the children in my group.

I learn new things by 'having a go' and I always persevere if I find things hard.

I have worked here at Ravensbury for over 17 years!

Having fun is an important part of learning. All of the activities we do encourage children to want to learn more. They develop a sense of achievement and make them smile.

Maths is the most fun when you can work with your friends and learn new skills to solve problems.
